

SITE INSPECTION REPORT

CATEGORY C – ROAD-LOW WATER CROSSING

Applicant		PA ID #		Applicant Representative		Applicant Representative Title	
Site Inspection Date				Site Inspector Name			
Work Order #				Damage #			
Facility: ☐ Road ☐ Low Water Crossing							
GPS Start Latitude				GPS Start Longitude			
GPS End Latitude				GPS End Longitude			
NOTE: All damaged facilities longer than 200 linear feet require coordinates for both endpoints.							
Date Damaged			Age of Facility			Legal Responsibility	
			☐ Exact			☐ Yes	
			☐ Approximate			☐ No	
Year Built:							
Road Type:			Dimensions		Number of Lanes		
☐ Asphalt			Length:				
☐ Concrete			Width:				
☐ Composite							
☐ Chip & Seal							
☐ Dirt							
☐ Gravel

NOTE FOR SITE INSPECTOR: Please ask the Applicant representative the following questions. Although the PDMG may have already asked some of these questions, the Applicant representative at the site inspection may have additional information. Use the Additional Notes section to record any additional explanation.

Mitigation Considerations

FEMA Public Assistance encourages protection of disaster-damaged facilities by providing assistance for cost-effective hazard mitigation measures that reduce or eliminate the risk of similar damage from happening again in a future event. For each question, elaborate on the answer in the space provided for comments.

1. **Identify the specific cause of damage (such as water eroded {under the toe and slab, the driving surface, the road at the end of the LWC} or debris blocked the culvert in the LWC, etc.).**

2. **What can be done to prevent future damage in a similar event? (check all of interest to the Applicant):**

- ☐ Form and pour deeper concrete toes along the LWC upstream and downstream edges.
- ☐ Anchor the LWC toes with vertical steel rebars in holes drilled into the bedrock.
- ☐ Form and pour steel reinforced concrete instead of grouted riprap on the LWC slopes.
- ☐ Replace the low-water crossing with a bridge. (Note: A Hydrology & Hydraulic Study will be needed)
- ☐ Increase the steel reinforcing in the concrete slab and toes.
- ☐ Other mitigation (specify):

3. **Does the Applicant plan to perform additional work to protect damaged facilities against similar damage in a future event?**

- ☐ Yes
- ☐ No
- ☐ Unsure

Comments:

4. **Will the Applicant provide a proposal for hazard mitigation work?**

- ☐ Yes
- ☐ No
- ☐ Unsure

Comments:

5. **Would the Applicant like FEMA to prepare a proposal for hazard mitigation work?**

- ☐ Yes
- ☐ No
- ☐ Unsure

Comments:

Record any additional notes about the Applicant's interest in hazard mitigation opportunities and other relevant information in the space below. This information will be used by hazard mitigation specialists and costing specialists to develop a hazard mitigation proposal (HMP) for the Applicant's consideration. Potential Mitigation Scope of Work: (Include dimensions, quantities and sketches of HMP measures).

The following mitigation measures will help prevent future damage in a similar event:

Applicant Representative Initials: _____

Category C

Insurance Considerations

FEMA is legally prohibited from duplicating benefits from other sources and will reduce eligible costs by the amount of insurance proceeds received.

1. **Does the damaged facility have insurance coverage and/or is it an insurable risk (e.g., buildings, equipment, vehicles)?**

- ☐ Yes
☐ No
☐ Unsure

Comments:**Environmental & Historic Preservation Considerations**

FEMA is required to ensure that work complies with applicable environmental and historic preservation laws, regulations, and executive orders.

1. **Is the damaged facility(ies) located within a floodplain or a coastal high hazard area and/or does it have an impact on a floodplain or wetland? Can the project site be impacted by flooding? Will work occur within 200 feet of a waterway/waterbody?**

- ☐ Yes
☐ No
☐ Unsure

Comments:

2. **Is the damaged facility located within or adjacent to a Coastal Barrier Resource System Unit or an Otherwise Protected Area?**

- ☐ Yes
☐ No
☐ Unsure

Comments:

3. **Will the proposed facility repairs/reconstruction change the pre-disaster conditions (e.g., footprint – including depth of footprint, material, location, capacity, use or function), including construction of an access road, establishing a staging area, or other work outside of the constructed right-of-way? If yes, describe changes or work outside of the constructed right-of-way. Provide detailed justification for the change (e.g. codes and standards).**

- ☐ Yes
☐ No
☐ Unsure

Comments:

4. **Is the damaged facility(ies) listed on a local/state/national historic register or is it a locally recognized landmark? Is it older than 45 years? (Provide the age of the facility) Are there more, similar buildings near the site?**

- ☐ Yes
☐ No
☐ Unsure

Comments:

5. **Are there any large, undeveloped or undisturbed areas on, or near, the project site? (Select “yes” if there are large tracts of forestland, grassland, or naturally preserved areas, etc.)**

- ☐ Yes
☐ No
☐ Unsure

Comments:

6. **Are there any hazardous materials at or adjacent to the damaged facility?**

- ☐ Yes
☐ No
☐ Unsure

Comments:

7. Are there any other environmental or controversial issues associated with the damaged facility and/or work item? (select yes if facility is a road maintained by a Tribal Government or if the project necessitates the establishment of a new borrow area or the horizontal expansion of an existing borrow area.)

- ☐ Yes
☐ No
☐ Unsure

Comments:

8. Are there any known endangered species in the work area?

- ☐ Yes
☐ No
☐ Unsure

Comments:
